## TEACHER RESOURCES TO SUPPORT *FORCES OF NATURE*

### CREATE YOUR OWN NATURAL DISASTER ONLINE

*- An interactive website designed to support IMAX Forces of Nature*

National Geographic – makers of *Forces of Nature* - have produced a website which directly supports the film. It includes a wealth of information about natural disasters on a global scale as well as a series of very clever computer simulations which enable students to unleash nature's fury themselves. Highly recommended!

To create your own disaster online, visit: [www.nationalgeographic.com/forcesofnature](http://www.nationalgeographic.com/forcesofnature)

### GEOHAZARDS FACT SHEETS ONLINE

*- A series of detailed Fact Sheets on geohazards in Australia, from Geoscience Australia*

Geoscience Australia is the nation's premier agency for geoscience research and monitoring. Geoscience Australia operates an Education Centre in Canberra which offers school excursion visits and teachers have access to a wealth of information online, including local Australian case studies. For more info, visit: [www.ga.gov.au](http://www.ga.gov.au)
