NOTES:

* Denotes new film. Rating is yet to be advised.

All films are rated G and available year round unless specified otherwise. Film release dates and availability are subject to change. Please check with our Booking Office for the latest information.

Looking for a rewarding excursion where fun and entertainment is the focus?

- **Deep Sea 3D** : A great all-round film for primary and secondary students with a subject to suit everyone. Great 3D effects! Our most popular film of the last year!
- **Fly Me To The Moon 3D** : A fun, animated 3D film ideal for primary students as an end of year treat. Going into Space was never meant to be this much fun...
- **Space Station 3D** : This ever-popular film has some eye-popping 3D moments and seat-rumbling rocket launches. You'll feel like you're floating in space with the astronauts.

FEATURE FILMS

Selected feature films have been digitally enhanced and enlarged to the giant IMAX format. Call our booking office to enquire about release dates and film titles. In 2008, we can look forward to:

- **U2 3D** : A concert film shot during U2's recent Vertigo Tour, due out in April. Teachers—forget the students—book U23D for your next staff get-together at IMAX!
- **Harry Potter and the Half-Blood Prince** : The next instalment in the Hogwarts series, this time featuring 45 minutes in 3D, due out in November, so ideal for end of year excursions.
