

WORLD'S BIGGEST  
IMAX 3D

# UNDER THE SEA 3D

Screening from March 2009 on the  
World's Biggest IMAX Screen in Sydney's Darling Harbour.

*UNDER THE SEA 3D*, the newest IMAX 3D underwater adventure from the award-winning filmmakers behind *DEEP SEA 3D*, will transport audiences to uniquely exotic locations in the Asia-Pacific region, including The Great Barrier Reef, Southern Australia, Papua New Guinea and Indonesia, to experience face-to-face encounters with some of the ocean's most mysterious and unusual creatures.

Filmed with the IMAX 3D camera, the highest resolution motion picture camera ever created, *UNDER THE SEA 3D* also offers an inspirational and entertaining way to explore the impact that global climate change has had on our ocean wilderness.

*"The dazzling colours and amazing animals we see from South Australia to the Indo-Pacific are made for the grand scale and intensity of IMAX 3D," said Toni Myers, the film's producer, editor and writer. "But these spectacular yet delicate ecosystems are threatened by climate change. It's vitally important to promote awareness of that, especially among the young people who will be the stewards of our planet's health and well-being."*
